

🧁 ✨ Module 1 – Opening Your Bakery ✨ 🏠

Hello again 😊

Before a bakery can sell anything, the shop must first open its doors.

This module focuses on setting up the ‘**Foundations**’ of your page so ‘**Visitors**’ can discover you and begin exploring your content.

Step 1 – Complete Your Profile ✅

Your profile is your shopfront window. Fill out ‘**Your Photo**’, ‘**About Me**’, ‘**Likes**’, and basic info.

Step 2 – Begin Verification 🛡️

Start the ‘**Verification Process**’ so your account is ready to grow.

Step 3 – Upload Your First Content 📺

Begin stocking your shelves. A few pieces of content is enough to start.

Step 4 – Add Photos to Your Galleries 📷

Photos act like ‘**Free Advertising**’ for your bakery and help bring visitors in.

Step 5 – Accept Friend Requests 🤝

Followers are like customers entering your shop. ‘**Accept Genuine Requests**’ so they can receive notifications when you upload.
